SPSS, STATA, SAS Base, Atlas.ti

MS Office:

Excel (VBA), PowerPoint, Word

Hobbies

Handicraft, archeology and backpacking

I am a software programmer with 3-years' professional experience, specializing in website development. My field of expertise ranges from front-end to 'soft' back-end technologies. During my career I was involved in user-interfaces creation as well as client-server communication, databases architecture design and testing. Moreover, my experience gained in the previous profession of a market researcher allows me to successfully play the role of a client liaison in the field of technological analysis of requirements, functionalities implementation and training. I am looking for job opportunities that will allow me to utilize my potential and broaden my skills and knowledge comprehensively, under the guidance of experienced mentors. I kindly invite you to look at my GitHub portfolio.

Key skills

JavaScript

React

HTML

CSS

Styled-components

SASS

Node.js

GraphQL

SQLite

Webpack

Git

Redux

ECMAScript

Jest

Cypress.js
