Hobbies

DIY wonders, old worlds, new places

I am a software developer with seven years of experience specializing in complex web development, with expertise spanning front-end and soft back-end technologies.

Throughout my career, I have been involved in creating user interfaces, managing client-server communication, designing database architectures, testing, and occasionally overseeing project management. My prior experience as a market researcher enhances my ability to act as a client liaison, analyzing technological requirements, implementing functionalities, and delivering training sessions.

I am seeking job opportunities that will allow me to maximize my potential and further develop my skills and knowledge while working with experienced mentors.

I kindly invite you to look at my _GitHub portfolio_.

Key Skills & Technologies

Front-End Focus · Back-End Support · TypeScript · React.js · Vite · Webpack · Tailwind · Styled-components · Node.js · GraphQL · SQLite · Jest · Vitest · Testing Library · Git · Figma · PM Experience · Client Liaison

Work Experience

04.2021 – StratoKit SA
Full-stack Developer
- Maintenance of software integrations for the construction industry.
- Full-stack development of web applications.
- Project management (Github Projects).
- Co-design of the apps architecture (SQLite, GraphQL, Node.js, Redux-like events flow).
- Collaborated closely with clients to identify their needs and deliver tailored technical solutions (references available upon request).
- Contributed to the migration of the codebase from React.js/Jest to Vite/Vitest.

10.2017 – 04.2021 Yaska Polska Sp. z o.o.
Software Developer
- Developed websites for Belgian companies and NGOs.
- User interfaces creation (React.js, Final-form, styled-components, and more).
- Full-coverage testing (Jest, Cypress.js).
- Client liaison: recognition of needs and technological implementation.

12.2016 – VoiceMap PTE LTD – GPS audioguides
Created GPS-based audio guides, designing immersive experiences for tourists.
